## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 – 5 and 14 – 18, drawn to a data storage system and method, classified in class 711, subclass 114.
  - II. Claim 6 – 13, drawn to a method of providing and managing data storage service, classified in class 705, subclass 1.
  
2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because particular structures recited in the claims of invention I are not needed to provide services claimed in invention II. The subcombination has separate utility such as in-house management of storage systems without any service level agreements and refund policies.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
